

Fiat-trade union negotiations

Individual negotiations scheduled with the trade unions relating to production of the future Panda at the Giambattista Vico plant in Pomigliano d'Arco are concluded.

From the discussions, it has emerged that FIM, FIOM, FISMIC, UILM and UGL have divergent positions on issues that are fundamental to the negotiations.

As of today, therefore, we report the absence of a common stance on the application of all conditions that would provide the flexibility and competitiveness necessary for realisation of the future Panda project.
